# GO XTRA DARK

Transitions XTRActive lenses are the darkest everyday lenses ever. They darken even inside the car\*, fading back indoors.

- /// XTRA dark outdoors even in hot temperatures (up to category 3)
- /// XTRA activation in the car with new innovative photochromic technology (up to category 2)
- /// XTRA comfort in all light conditions (the slight tint indoors enhances customers' comfort all day long)

## Crizal® Transitions® XTRActive™ lenses in a few words

Transitions XTRActive lenses are new everyday adaptive lenses, that go extra dark outdoors.

They go extra dark in sunny conditions and also darken inside the car, to offer superior visual comfort.

As all Transitions lenses, Transitions XTRActive protect your eyes, blocking 100% UV rays, 100% of the time.

Combine them with Crizal for the best enduring clarity of vision and better fade back time.

\* Darkening of Transitions XTRActive lenses behind a windscreen of a car is influenced by several factors including shape and inclination of the windscreen, windscreen transmission, driver position, lateral windows.

**XTRA choice for XTRA customers**

Transitions XTRActive lenses are ideal for dynamic, active, and modern customers who tend to have professional or leisure activities outdoors and spend time driving.

**Transitions VI lenses**

- /// Clear indoors
- /// Darken outdoors
- /// Fastest fade back
- /// Reduce glare
- /// Block 100% of UV rays
