

# A SHARED VISION OF QUALITY

We all tend to take the lenses in our spectacles for granted. Yet each one produced by Vanalstynes is a small piece of precision engineering

Vanalstynes is the only independent manufacturer of optical lenses in Lancashire. Their modern optical laboratory supplies branded lenses from world-leaders such as Essilor, Nikon, Hoya and Carl Zeiss and they also manufacture a large range of high quality non-branded lenses.

Vanalstynes only supply to independent opticians – among them is Broadhurst Optometrists, which opened a new flagship practice in Preston a few months ago.

“We have had a long-standing relationship with Broadhurst’s and we are proud to be associated with such a high brand practice. They have a reputation for high quality and superb customer service which is something we also pride ourselves on,” said Vanalstynes’ Managing Director Colin Evans.

Vanalstynes is a relatively small company employing 17 staff. They do not supply lenses to the multi-national optical chains, preferring to work with the independent sector instead.

“As an independent lens manufacturer

we have built close links with independent opticians like Broadhurst’s who share our commitment to the customer. It is important that opticians can buy from us at the right price, that we offer the highest quality lenses and that we always assure them of a reliable and bespoke service,” added Colin.

pair of spectacles to the opticians practice.

“When customers go to collect their spectacles from respected independent opticians like Broadhurst’s they can be assured the lenses are of the highest quality, expertly manufactured and fitted by us,” said Colin. ■
